

Festool Announces Innovative New Solutions for Jobsite Cleanliness and Efficiency

Premium tool manufacturer enhances on-site performance with the Air Filter, upgraded Dust Extractors and advanced cordless lighting.

OTTAWA, On., February 20, 2025 — [Festool](#), a leader in innovative, precision-engineered, and durable power tool solutions, announced its latest lineup of jobsite and workshop essentials designed to enhance efficiency and cleanliness for professionals. The new release includes the SYS-AIR Air Filter for improved dust control, upgraded CT Dust Extractors, the high-performance Cordless Task Light and Cordless Site Light for optimal visibility in any environment, and advanced GRANAT abrasives for superior sanding performance.

“We’re excited to introduce the SYS-AIR, the ultimate air filtration solution for workshops and job sites,” said Philip Strnad, Director of Brand Marketing at Festool. “At Festool, we’re committed to creating better, faster and cleaner work environments. The SYS-AIR delivers powerful air filtration that removes even the tiniest dust particles from the air to help professionals breathe easier, resulting in reduced cleaning efforts and enhanced air quality.”

SYS-AIR Air Filter: Take Control of Dust

Festool is setting a new standard for air quality with the launch of the SYS-AIR Air Filter. Designed to combat airborne dust, the SYS-AIR combines powerful filtration technology in a compact, lightweight Systainer format, making it ideal for mobile use. With a two-stage filter system, the SYS-AIR effectively captures even the finest dust particles—providing over 99.9% filtration for cleaner air and reduced cleanup time. For optimized dust control across locations, pair the SYS-AIR with these accessories:

Air Supply Hose: For hard-to-reach locations, pair a dust containment wall with the Air Filter to help prevent dust and dirt from escaping the work area. The flexible hose creates a vacuum that can be positioned directly at the dust source to capture airborne particles as they are created.

Ceiling Bracket: For stationary use, permanently mount the SYS-AIR in the workshop with the ceiling bracket. It features a T-LOC to quickly remove from the bracket for mobile use.

CT 26/36/48 EI Mobile Dust Extractors: Next Generation for any Application

The next generation of Dust Extractors include Bluetooth® as a standard. Easily start the extractor using a Bluetooth®-equipped Festool tool or CT FI Remote and connect seamlessly to the Festool Work app, allowing users to adjust cleaning intervals and receive alerts directly on your smartphone.

CT 26/36 EI: The CT 26/36 Dust Extractors are durable and versatile for work in the shop or on the job site, with added flexibility thanks to the built-in Bluetooth® interface.

CT 36/48 AC EI: The CT 36/48 AC Dust Extractors feature enhanced automatic filter cleaning, specifically designed for high-volume, fine dust extraction. The upgrade ensures consistently high suction power across longer working intervals.

SYSLITE KAL C Task Light: Natural Light Anywhere

The new SYSLITE KAL C Task Light is the ideal companion for precision work in tight spaces. With up to 1200 lumens of daylight-quality brightness, its compact and lightweight design ensures easy handling and portability. The swiveling lamp head provides flexible positioning and the three adjustable brightness levels allow for tailored lighting.

SYSLITE KBS C Site Light: Bring Light to Every Job Site

The new SYSLITE KBS C Site Light delivers powerful illumination with up to 5000 lumens of daylight-quality brightness. Designed for medium-sized surfaces, the light can be dimmed to any level and positioned in multiple ways, with magnetic attachment, screw mounting, or tripod placement. The light's swiveling body allows for optimal lighting angles, making it an essential tool for job sites.

GRANAT Abrasive

The new GRANAT Abrasive Systainer Sets offer a selection of abrasives to cover all Festool sander sizes. Users will experience an array of grits, neatly organized in a Systainer for easy access and organization.

Pricing & Availability

Starting March 26, 2025, the SYS-AIR Air Filter (57790) will be available starting at \$1,079.00. The SYS-AIR HEPA Air Filter (57791) will be available starting at \$1,199.00. Air Filter accessories starting at \$135.00. The CT 26 EI HEPA (577871) will be available starting at \$1,145.00. The CT 36 EI HEPA (577872) will be available starting at \$1,235.00. The CT 36 EI AC HEPA (577874) will be available starting at \$1,395.00. The CT 48 EI AC HEPA (577876) will be available starting at \$1,485.00. The SYSLITE KAL C Task Light (578128) will be available starting at \$79.00. The SYSLITE KBS C Site Light (578126) will be available starting at \$215.00. The Abrasives Systainer³ (578195) starting at \$145.00.
