Get Sharp: Introducing Festool's Sharpening Services

Festool makes sharpening blades easier and better for all—send in the blades you want serviced, and Festool will take care of the rest.

Ottawa, ON., October 22, 2024—Festool, a leading manufacturer of innovative, precision-engineered, and durable power tool solutions, introduced its new sharpening service for those unable to find a reliable saw blade sharpening service in their local area. The new service offer will help make your blade as sharp as new, no matter where you're located.

"We want every one of our saw blades to perform just like it did when you bought it, so we're helping provide a more economical approach to buying a replacement," said Philip Strnad, Director of Brand Marketing at Festool. "That's why we introduced our Sharpening Service, in partnership with Aiguisatek, to make sure our customers get the best and easiest service for each and every one of their Festool blades.

Festool's Sharpening Partner, Aiguisatek, has been in the business since 1986. Its team has the experience and passion to make Festool blades perform even better and last longer. Aiguisatek uses the latest technology and equipment to offer fast and precise carbide-tipped blade sharpening services.

When customers order a sharpening, they will receive a prepaid shipping label. All they have to do is attach the label and take the blades to the nearest Puralator location. Festool will deliver sharpened blades right back to the customer's doorstep.

Not only will all orders ship at no cost, but Festool is including up to 3 tip replacements and an ultrasonic cleaning. Festool's Sharpening Service offers bulk discounts, so the more blades a customer sends in, the more money they will save. Customers get $12 off with 3 blades, $25 off with 5 and a 10% discount when they send in 8 blades.

Festool Canada is based in Ottawa, ON. For more information, visit https://www.festoolcanada.com/.

About Festool

Festool has been developing innovative, precision-engineered and durable power tool solutions for nearly a century.
